ROLES AND RESPONSIBILITIES AT ‘SAFETY LABS’

Product base - Tele Medicine Health-Care/Home-Care Company

- Lead developer team to create a role-based authorization web-portal on Salesforce, Java and HTML5, deigned to scheduler appointments, track control and plan days for practitioners and patients,
- Implemented best quality JavaScript and library code to make application run seamlessly by changing the suitable architecture as per performance,
- Enhanced the performance of APIs and Client-apps (Front-end) running on companies dedicated hardware,
- Took care of all client-side and front-end applications to create functionalities which worked smoothly and bugs free,
- Connect with Q/A team and provide enough data to test products,
- Working with Salesforce team as Developer and Admin to develop and configure assigned Sandbox and server along with team.

ROLES AND RESPONSIBILITIES AT ‘NETCREATIVE MIND’

3rd party Government company, building government Web-portals and Mobile-apps.

- Getting thorough the project documents to create and plan the project data flow with seniors and BA,
- Handled UI/UX development (using Figma) and coding them on JSP and HTML5,
- Worked on Newgen's products, like: OmniDoc, OmniScanner, and wrote code in Java, and Advanced Java, to create flow and implement validations,
- Fixing bugs making the project come online without issue.
- Fixed many unresponsive buggy APIs which were for several month, which even seniors were not able to fix.

Summary

Fully dedicated, ambitious and hardworking developer with broad skills in full-stack web development. My goal is to become benchmark of developers in terms of skills including Client-side, Server-side, Database, API-management, and, Front-end looking forward to utilizing my skills to create outstanding products and continuously improving my abilities to excel further in my field.
