EDUCATION

Masters
MCA – Amity University 2023-pursuing

Specialization
GNIIT - Web Development – from NIIT *(Regular)* 2019-2022

Graduation
BCA form IGNOU *(Offline exams)* 2018-2021

LANGUAGE

Hindi | English
Java | JavaScript

I am a results-driven software engineer proficient in web development, specializing in Java and JavaScript technologies. My expertise lies in creating efficient and user-friendly web solutions.

My strong background in Full-Stack Development combined with my passion for coding makes me a valuable asset to the company.

My aim is on providing quality performant applications, using best algorithm and practices.

I have total 2 years of experience excelling in development, bug-fixing, and logic building.

I am exemplary in working with multiple technologies and libraries.

Successfully collaborator with the Salesforce coding and Admin teams.

PROFFESSIONAL EXPERIENCE

Safety Labs, Noida Sec-2 *(Canadian Company)*
Java-Developer > Full-Stack Web Developer with Java and JavaScript | Feb/2022-present

- Fixed API and optimized Server APIs, and Client-applications on web servers.
- Optimized client-side algorithms for low power dedicated hardware.
- Led development of role-based responsive web portal for medical practices (AION).
- Integrated Salesforce for scheduling and tracking the mobile care workers.
- Managed client-side applications to ensure smooth free operations.
  - CNE, HC, UMI, MHC, AION, AI Wizard, Beverage Stores (in-progress)
- Created a calendar-based appointment scheduling system with approvals from both parties and custom AI-driven suggestions based on their availability.
- Seamlessly integrated the project with servers and APIs of other companies, fostering collaboration and expanding functionality.
- Collaborated with Quality Assurance team and provided detailed product testing documentation.
- The health care projects contained the multiple ways to take the vital reading of the patients and process them before presenting them to the provider and patients.
- Worked with Salesforce Developers and Admin.
- Developed AI powered web app for browser and IOT devices used in beverages stores.

NetCreativeMind, Katwaria Sarai (Government Company)
